Target Corporation - Water 2018

W0. Introduction

W0.1

(W0.1) Give a general description of and introduction to your organization.

Minneapolis-based Target Corporation (NYSE:TGT) serves guests at 1,822 stores and via Target.com. Since 1946, Target has given 5 percent of its profit to communities. For more information about Target’s commitment to corporate responsibility, visit https://corporate.target.com/corporate-responsibility/.

CDP system functionality only allows for 365 days to be reflected in the start and end date fields below. The results contained in this CDP survey are for Target’s fiscal year 2017 (Jan. 29, 2017 through Feb. 3, 2018) which consisted of 53 weeks instead of the usual 52.

W0.2

(W0.2) State the start and end date of the year for which you are reporting data.

<table>
<thead>
<tr>
<th>Reporting year</th>
<th>Start date</th>
<th>End date</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>January 29 2017</td>
<td>January 28 2018</td>
</tr>
</tbody>
</table>

W0.3

(W0.3) Select the countries/regions for which you will be supplying data.

- China
- India
- Singapore
- United States of America
- Viet Nam
W0.4

(W0.4) Select the currency used for all financial information disclosed throughout your response.
USD

W0.5

(W0.5) Select the option that best describes the reporting boundary for companies, entities, or groups for which water impacts on your business are being reported.
Companies, entities or groups over which operational control is exercised

W0.6

(W0.6) Within this boundary, are there any geographies, facilities, water aspects, or other exclusions from your disclosure?
Yes

W0.6a

(W0.6a) Please report the exclusions.

<table>
<thead>
<tr>
<th>Exclusion</th>
<th>Please explain</th>
</tr>
</thead>
<tbody>
<tr>
<td>Non-U.S. Facilities</td>
<td>Our current disclosure does not include our headquarters and operational facilities outside of the United States (buildings in India, and several small offices scattered around the globe). These facilities are currently excluded due to a lack of reliable data on water consumption. Based on estimates of potential consumption from all of these sources, they are considered de minimis and would likely contribute a normal portion to our total consumption.</td>
</tr>
</tbody>
</table>

W1. Current state
### W1.1

(W1.1) Rate the importance (current and future) of water quality and water quantity to the success of your business.

<table>
<thead>
<tr>
<th></th>
<th>Direct use importance rating</th>
<th>Indirect use importance rating</th>
<th>Please explain</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sufficient amounts of good quality freshwater available for use</td>
<td>Important</td>
<td>Important</td>
<td>We will focus our freshwater stewardship efforts in areas and on issues where our influence and support can help deliver the greatest impact. Our water risk assessment has highlighted where properties and parts of our supply chain are exposed to high risk and our stores and the communities they sit within are dealing with record-level droughts and flooding in certain basins.</td>
</tr>
<tr>
<td>Sufficient amounts of recycled, brackish and/or produced water available for use</td>
<td>Have not evaluated</td>
<td>Have not evaluated</td>
<td>Many of our stores are designed with storm water systems in the parking lot and grounds to collect and clean rainwater before it flows into the ground. We complement the native landscapes with features like rain gardens that naturally slow and clean storm water runoff and mitigate flooding. Given Target's growing interest in freshwater stewardship, we anticipate evaluating the use of recycled, brackish and/or produced water in the future. In 2017, we continued to work toward incorporating native landscaping in 75 percent of the landscape areas of all new U.S. stores; work that began in 2015. Realizing the potential for changes to water availability around the world, we also set a goal to reduce our water consumption by 15 percent for our stores, distribution centers, and headquarters locations in the U.S. by 2025.</td>
</tr>
</tbody>
</table>

### W1.2

(W1.2) Across all your operations, what proportion of the following water aspects are regularly measured and monitored?

<table>
<thead>
<tr>
<th>Water withdrawals – total volumes</th>
<th>% of sites/facilities/operations</th>
<th>Please explain</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>76-99</td>
<td>Target consumes water almost exclusively from municipal water utilities, and uses utility bills to calculate withdrawal volumes. A small number of sites (less than 1% of stores) use well water or lake/pond water for irrigation, and we do not have a meter at these facilities to report the amount of water captured and used for irrigation there.</td>
</tr>
</tbody>
</table>

<table>

W1.4

(W1.4) Do you engage with your value chain on water-related issues?

Yes, our suppliers

W1.4a

(W1.4a) What proportion of suppliers do you request to report on their water use, risks and/or management information and what proportion of your procurement spend does this represent?

Row 1

% of suppliers by number
76-100%

% of total procurement spend
Unknown

Rationale for this coverage
Target requests environmental data inclusive of water use and management from all owned-brand general merchandise manufacturers (including Apparel, Accessories, Home and Hardlines).

Impact of the engagement and measures of success
Target utilizes this data to inform participation in water efficiency programs and to prioritize our engagement on water quality and use with our manufacturing supply chain.

Comment
We request all of our owned-brand suppliers complete the SAC Higg Index assessment (except those regulated by FDA), which is considered as Target reports on our water use, risks and management information. To date we have worked with Target's owned-brand suppliers via improvement programs to increase their water efficiency resulting in over 2 million cubic liters of water savings.

W1.4b

(W1.4b) Provide details of any other water-related supplier engagement activity.

<td>Unknown</td>
</tr>
</tbody>
</table>

Rationale for the coverage of your engagement
Target engages manufacturers that produce all owned-brand general merchandise, including Apparel, Accessories, Home and Hardlines.

Impact of the engagement and measures of success
Target ensures all owned-brand products are compliant with local regulations prior to production. We do this through our pre-production audit by asking specific questions to validate our water standard within Target's SOVE. Target's SOVE (LINK: https://corporate.target.com/corporate-responsibility/responsible-sourcing/social-compliance/standards-of-vendor-engagement).

</table>
% of total procurement spend
Unknown

Rationale for the coverage of your engagement
Target works with high impact owned-brand suppliers in China and Vietnam to improve on innovation and water efficiency.

Impact of the engagement and measures of success
Taihu Water stewardship - We collaborate with the industry and NGOs like WWF, to test the ability to scale local supply chain efforts through joint textiles work in China's Taihu basin.
Vietnam Improvement Program (VIP): Since 2016, we have partnered with International Finance Corporation (IFC) to create VIP which aims to promote green manufacturing supply chain in Vietnam, focuses on footwear and apparel. In 2017, 10 Target factories have realized over 1 million cubic meters of water and 130 million kWh of energy savings per year. Investments to achieve these savings pay for themselves in less than 5 months. Clean by Design: As a long term partner of the Natural Resources Defense Council (NRDC) in driving the Clean by Design (CBD) initiative, we partner with our supply chain to minimize the environmental impacts of textile mills. In 2017, Target suppliers were able to save nearly 1 million cubic meters of water and over 10 million kWh of energy per year.

W2. Business impacts

W2.1

(W2.1) Has your organization experienced any detrimental water-related impacts?
Yes

W2.1a

(W2.1a) Describe the water-related detrimental impacts experienced by your organization, your response, and total financial impact.

Country/Region
United States of America

River basin
Not known
Type of impact driver
Physical

Primary impact driver
Severe weather events

Primary impact
Disruption of sales

Description of impact
The 2017 Hurricane season (Irma, Harvey, and Maria) in the United States has been called the most expensive in history.

Primary response
Other, please specify (We cannot control severe weather events.)

Total financial impact
0

Description of response
Uncharacteristic or significant weather conditions can affect consumer shopping patterns, particularly in apparel and seasonal items, which could lead to lost sales or greater than expected markdowns and adversely affect our short-term results of operations. In addition, our three largest states by total sales are California, Texas and Florida, areas where natural disasters are more prevalent. Natural disasters in those states or in other areas where our sales are concentrated could result in significant physical damage to or closure of one or more of our stores, distribution centers or key vendors, and cause delays in the distribution of merchandise from our vendors to our distribution centers, stores, and guests, which could adversely affect our results of operations by increasing our costs and lowering our sales.

W2.2

(W2.2) In the reporting year, was your organization subject to any fines, enforcement orders, and/or other penalties for water-related regulatory violations?
No

W3. Procedures

W3.3
(W3.3) Does your organization undertake a water-related risk assessment?
Yes, water-related risks are assessed

W3.3a

WWF-DEG Water Risk Filter

Comment
In 2017, Target engaged WWF to conduct a Water Risk Assessment to review our water use reduction efforts across our manufacturing supply chain, stores and distribution facilities. This helped us develop a holistic approach that acknowledges water as part of a bigger global system of megatrends. Our plan is ambitious, so we will focus our efforts in four main areas (Raw Materials; Manufacturing; Direct Operations; and Beyond the Fenceline).

**W3.3d**

(W3.3d) Describe your organization's process for identifying, assessing, and responding to water-related risks within your direct operations and other stages of your value chain.

Target is embarking on a multiyear collaboration with World Wildlife Fund (WWF). In 2017, WWF mapped Target’s U.S. stores and distribution centers as well as our owned-brand manufacturing locations using the WWF Water Risk Assessment to understand our enterprise risks and help build a more comprehensive strategy and goal roadmaps related to freshwater stewardship.

Target stores and distribution centers make up a majority of our direct operational facilities in the United States. Twenty-two percent of Target’s stores and distribution center’s water withdrawals were in areas of high stress. By conducting the water risk assessment, it has
helped us focus our U.S. direct operation's conservation programs and capital expenditures at facilities where there is potential for higher water risk or scarcity in the future.

The information helped support our decision in scaling local supply chain efforts through collaborative work in strategic locations that are facing high water risks. In addition to WWF, we continue to work with our suppliers to understand and reduce water consumption within our supply chain through our partnership with the Natural Resource Defense Council and the International Finance Corporation.

We also collaborate with the industry and NGOs like WWF, to test the ability to scale local supply chain efforts through joint textiles work in China's Taihu basin.

We anticipate working with WWF in 2018 to further refine and focus our freshwater stewardship efforts in areas and on issues where our influence and support can help deliver the greatest impact.

W4. Risks and opportunities

W4.1

(W4.1) Have you identified any inherent water-related risks with the potential to have a substantive financial or strategic impact on your business?
Yes, both in direct operations and the rest of our value chain

W4.1a

(W4.1a) How does your organization define substantive financial or strategic impact on your business?
Target considers multiple factors in evaluating risk. Target considers risks substantive when they are assessed to be high or critical using proprietary criteria. Importantly, something that
has a "substantive financial or strategic impact on our business" is not necessarily "material" to investors as defined by the SEC.

W4.1b

(W4.1b) What is the total number of facilities exposed to water risks with the potential to have a substantive financial or strategic impact on your business, and what proportion of your company-wide facilities does this represent?

<table>
<thead>
<tr>
<th>Total number of facilities exposed to water risk</th>

W6.3
(W6.3) Below board level, provide the highest-level management position(s) or committee(s) with responsibility for water-related issues.

**Name of the position(s) and/or committee(s)**
Chief Sustainability Officer (CSO)

**Responsibility**
Both assessing and managing water-related risks and opportunities

**Frequency of reporting to the board on water-related issues**
As important matters arise

**Please explain**
Jennifer Silberman oversees corporate responsibility across Target as the Vice President of Corporate Responsibility. She reports to Rick Gomez, Executive Vice President and Chief Marketing Officer at Target.

---

**W6.5**

(W6.5) Do you engage in activities that could either directly or indirectly influence public policy on water through any of the following?

Yes, other

---

**W6.5a**

(W6.5a) What processes do you have in place to ensure that all of your direct and indirect activities seeking to influence policy are consistent with your water policy/water commitments?

In 2017, we collaborated with World Wildlife Fund (WWF) on a water risk assessment of our water reduction efforts across our supply chain, stores and distribution centers. As a result, in early 2018 we announced a holistic approach to freshwater stewardship that acknowledges water as part of a bigger global system linked to other megatrends such as climate change, rapid urbanization and population growth. Target's Water cross-functional team worked closely with our Government Affairs staff to ensure they were briefed and understand the new Freshwater approach as it relates to policy.

We are collaborating with NGOs, including WWF, to further our water stewardship efforts. We are testing the ability to scale local supply chain efforts through joint work on textiles in China's Taihu basin. In 2018, we also joined the Ceres Connect the Drops campaign to show...
our commitment to advancing water solutions that sustainably manage California’s stressed water supplies.

Target recently joined the Zero Discharge of Hazardous Chemicals (ZDHC) organization, and plans to use its wastewater guidelines for our 2025 manufacturing goal for water. The guidelines were designed to help companies reduce unwanted chemicals in manufacturing and prevent them from being discharged in wastewater and impacting surrounding communities.

W7. Business strategy

W7.1

(W7.1) Are water-related issues integrated into any aspects of your long-term strategic business plan, and if so how?

<table>
<thead>
<tr>
<th>Long-term business objectives</th>
<th>Are water-related issues integrated?</th>
<th>Long-term time horizon (years)</th>
<th>Please explain</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes, water-related issues are integrated</td>
<td>5-10</td>
<td>The water risk assessment has underscored the importance of contextualizing publicly stated goals so that resources and focus are on basins with the greatest risk. As significant growth or change in the business occurs, Target will revisit its risk assessment to ensure it remains relevant and comprehensive.</td>
<td></td>
</tr>
</tbody>

</tr>
</tbody>
</table>

W7.2

(W7.2) What is the trend in your organization’s water-related capital expenditure (CAPEX) and operating expenditure (OPEX) for the reporting year, and the anticipated trend for the next reporting year?
W7.3

(W7.3) Does your organization use climate-related scenario analysis to inform its business strategy?

<table>
<thead>
<tr>
<th>Use of climate-related scenario analysis</th>
<th>Comment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>We are beginning to explore connections between water and climate (ie, mitigation, adaptation) and are considering the role water stewardship can play in long-term business resilience. Greenhouse gas (GHG)emission reductions from operations are the primary climate related driver for changing short-term strategy. Reputational and potential regulatory/financial impacts have also influenced short term strategy. We recognize the long term impacts climate change and carbon regulations have on our business. The current and evolving tools prepare us to address any possible increases in extreme weather events associated with climate change. We have also begun examining environmental impacts embedded within our supply chain to understand our exposure to climate change. In 2017, we introduced a new climate policy and goals to guide progress. We continue to aim to reduce our greenhouse gas footprint and work with stakeholders to accelerate the transition to a low-carbon economy.</td>
</tr>
</tbody>
</table>

W7.3a

(W7.3a) Has your organization identified any water-related outcomes from your climate-related scenario analysis?

No

W7.4

(W7.4) Does your company use an internal price on water?

Row 1
Does your company use an internal price on water?
No, but we are currently exploring water valuation practices

Please explain
Target is working with WWF on better understanding the true cost of water and will be looking at its impact on our business. We expect to start this work in 2018.

W8. Targets

W8.1

(W8.1) Describe your approach to setting and monitoring water-related targets and/or goals.

<table>
<thead>
<tr>

<th>Monitoring at corporate level</th>
<th>Approach to setting and monitoring targets and/or goals</th>
</tr>
</thead>
<tbody>
<tr>
<td>Company-wide targets and goals</td>
<td>Targets are monitored at the corporate level</td>
<td>A lot of work occurred in 2017 in preparation for the launch of our corporate Freshwater Stewardship Approach which we introduced in March 2018. LINK: <a href="https://corporate.target.com/corporate-responsibility/planet/water">https://corporate.target.com/corporate-responsibility/planet/water</a> We’ve focused our efforts and set initial goals in four key areas where we can make the most impact: 1. Raw Materials: Our water footprint starts with growing the raw materials needed to produce our products, such as food and fiber, so we’re working to better understand our basin-level impacts to prioritize our responses. 2. Manufacturing: Working in our areas of greatest impact, we’ll enable our owned-brand manufacturers to do more with less water where local conditions demand, and aim for net-positive water quality outcomes in priority watersheds for people and nature. 3. Direct Operations: Across our stores, distribution centers and headquarters locations, we’re taking action to reduce water scarcity, improve water quality outcomes and manage stormwater flows. 4. Beyond the Fenceline: We’ll work with others around the world to encourage progress in the areas above and beyond our own business and operations, through cross-sector partnerships, team member engagement, philanthropic investments and more. We are now working thoughtfully on ensuring we have good monitoring in place to track progress on the goals that have been set.</td>

Water withdrawals

**Level**  
Site/facility

**Primary motivation**  
Water stewardship

**UN SDG Alignment**

**Description of target**  
By 2025: absolute water reduction by 15 percent in stores, distribution centers, and headquarters locations

**Quantitative metric**  
% reduction in total water withdrawals

**Baseline year**  
2010

**Start year**  
2017

**Target year**  
2025

**% achieved**  
9.9

**Please explain**  
Target is taking action to reduce water scarcity, ensure water quality compliance and address storm water flows. Having accomplished our 10 percent per square foot water reduction goal in stores four years early, we are excited to announce a new goal for 2025 to reduce Target's annual water consumption by over 500 million gallons. Our absolute water use reduction goal encompasses all areas of our direct operations. The change in the goal boundaries and metrics reflects the continuing importance of water conservation initiatives in our direct operations, throughout the entire business, and in the communities we serve. We’ve already seen a 9.9% absolute reduction in water usage in FY 2017, which included 53 weeks instead of the typical 52 weeks.

W9. Linkages and trade-offs

W9.1

(W9.1) Has your organization identified any linkages or tradeoffs between water and other environmental issues in its direct operations and/or other parts of its value chain?
Yes

W9.1a

(W9.1a) Describe the linkages or tradeoffs and the related management policy or action.

Linkage or tradeoff
Linkage

Type of linkage/tradeoff
Environmental restoration

**Description of linkage/tradeoff**
Many of our stores are designed with storm water systems in the parking lot and grounds to collect and clean rainwater before it flows into the ground. We complement the native landscapes with features like rain gardens that naturally slow and clean storm water runoff and mitigate flooding. Since 2015, Target has continued to work toward incorporating native landscaping in 75 percent of the landscape areas of all new U.S. stores.

**Policy or action**

**Linkage or tradeoff**
Linkage

**Type of linkage/tradeoff**
Decreased wastewater treatment

**Description of linkage/tradeoff**
One of our strategic mills in Vietnam uses low-liquor dyeing machine which reduces the production time significantly by 72%. This in return reduces the energy use of the factory. Also, they adopt the reverse osmosis technology to recycle 64% of their wastewater every day. This decreases the loading of wastewater treatment system.

**Policy or action**

**W10. Verification**

**W10.1**

**(W10.1) Do you verify any other water information reported in your CDP disclosure (not already covered by W5.1d)?**
Yes

**W10.1a**

**(W10.1a) Which data points within your CDP disclosure have been verified, and which standards were used?**
### W1. Current state

We verify Higg data for Tier 2 wet processing apparel textile mills.
