

Target Corporation - Forests 2019

F0. Introduction

F0.1

(F0.1) Give a general description of and introduction to your organization.

Minneapolis-based Target Corporation (NYSE:TGT) serves guests at 1,844 stores and via Target.com. Since 1946, Target has given 5 percent of its profit to communities. For more information about Target's commitment to corporate responsibility, visit <https://corporate.target.com/corporateresponsibility/>.

CDP system functionality only allows for 365 days to be reflected in the start and end date fields below. The results contained in this CDP survey are for Target's fiscal year 2018 (Feb. 4, 2018 through Feb. 2, 2019), which consisted of only 364 days.

F0.2

(F0.2) State the start and end date of the year for which you are reporting data.

	Start Date	End Date
Reporting year	February 4 2018	February 3 2019

F0.3

(F0.3) Select the currency used for all financial information disclosed throughout your response.

USD

F0.4

(F0.4) Select the stage(s) of the value chain which best represents your organization's area of operation pertaining to forest risk commodities.

	Stage of the value chain
Timber	Retailing
Palm Oil	Retailing
Cattle Products	Retailing
Soy	Retailing
Other - Rubber	Retailing
Other	Not applicable

F0.5

(F0.5) Do you produce, use, or sell materials or products that contain any of the forest risk commodities?

	Produce/use/sell	Disclosing	Explanation if produce/use/sell but not disclosing
Timber	Yes	Yes	<Not Applicable>
Palm Oil	Yes	Yes	<Not Applicable>
Cattle Products	Yes	No	Within our owned brands, cattle sourcing takes two forms –beef and leather. We have evaluated our sourcing position in beef and recognize that with our sourcing locations of the US and Australia (grass-fed) – we have a limited deforestation impact. In 2018, Target joined the U.S. Roundtable for Sustainable Beef (USRSB), a multi-stakeholder initiative to advance, support and communicate continuous improvement in U.S. beef value chain sustainability. When the USRSB's Sustainability Assessment Guidelines are finalized in 2019, we will begin reporting on our performance across indicators in four categories: animals, people, planet and profit. We are also a member of the Leather Working Group, and through that effort have been collecting data on our leather sourcing volumes.
Soy	Yes	No	Due to the nature of our animal protein businesses being domestically sourced, the most materially relevant volume (over 90%) of soy is domestic. We are currently evaluating the rest of our grocery assortment for materiality to deforestation risks from imported soy. . Meat, dairy, and all other products containing soy as an ingredient represented less than five percent of Target's sales in 2018.
Other - Rubber	Yes	No	Our initial data collection efforts have indicated that the rubber in some of our owned-brand products likely comes from high-risk deforestation areas. As such, we have started conversations with external stakeholders and other brands to determine how we might best mitigate our impact in this commodity and engage in multi stakeholder engagements
Other	No	<Not Applicable>	<Not Applicable>

F0.6

(F0.6) Are there any parts of your direct operations not included in your disclosure?

No

F0.7

(F0.7) Are there any parts of your supply chain not included in your disclosure?

Yes

F0.7a

(F0.7a) Identify the parts of your supply chain not included in your disclosure.

Exclusion	Description of exclusion	Potential for forests-related risk	Please explain
Business activity	Non owned-brand products sold in our retail operations (including store and online) are excluded from this disclosure.	Potential for forests-related risk but not evaluated	We have the greatest insight as well as influence over our owned-brand portfolio and supply chain.

F1.5c

(F1.5c) Why is production and/or consumption data not available for your disclosed commodity(ies)?

Forest risk commodity

Timber

Primary reason

Insufficient data on operations

Please explain

F1.6

(F1.6) Have you identified sufficient sources of sustainable materials to meet your current operational needs? If yes, what are you doing to ensure the security/continuity of this supply?

Timber

Sustainable source identified

Yes

Primary action to ensure supply

Supplier improvement plans to increase capacity of supply

Please explain

Once we have more data and a better understanding of the potential impact of our supply chain, we plan to engage in capacity building activities in the value chain.

Palm Oil

Sustainable source identified

Yes

Primary action to ensure supply

Supplier improvement plans to increase capacity of supply

Please explain

Once we have more data and a better understanding of the potential impact of our supply chain, we plan to engage in capacity building activities in the value chain. We are driving demand for and awareness of the importance of certified sustainable palm oil by requiring it in Target's owned-brand products covered by our commitment and our work in multi-stakeholder groups like The Consumer Goods Forum. In 2017, we also joined the Roundtable on Sustainable Palm Oil's North American Sustainable Palm Oil Network, designed to facilitate cross-sector work in a pre-competitive space on the sourcing of Certified Sustainable Palm Oil (CSPO) in North America, foster collaboration and impact programs in producing nations and share best practices.

F1.7

(F1.7) Has your organization experienced any detrimental forests-related impacts?

No

F2. Procedures

F2.1

(F2.1) Does your organization undertake a forests-related risk assessment?

Yes, forests-related risks are assessed

F2.1a

(F2.1a) Select the options that best describe your procedures for identifying and assessing forests-related risks.

Timber

Value chain stage

Supply chain

Coverage

Partial

Risk assessment procedure

Assessed in an environmental risk assessment

Frequency of assessment

Annually

How far into the future are risks considered?

Supply chain

Coverage

Partial

Risk assessment procedure

Assessed as a standalone issue

Frequency of assessment

Six-monthly or more frequently

How far into the future are risks considered?

1 to 3 years

Tools and methods used to identify and assess risks

Internal company methods

External consultants

Please explain

We partner with Proforest to identify risks in our supply chain.

F2.1b

(F2.1b) Which of the following issues are considered in your organization's forests-related risk assessment(s)?

Availability of forest risk commodities

Relevance & inclusion

Relevant, always included

Please explain

As a retailer with a wide variety of products, we understand the responsibility we have to protect forests around the world. We are committed to aiding in the global effort to end deforestation and forest degradation and focus our efforts in the places we can have the most positive impact today— specifically palm oil and wood-based materials. We are committed to sustainably sourcing palm, wood, paper and wood-based fibers in our priority owned brands, and wood-based fibers in packaging. We will build on our existing priority raw material commitments by evaluating high-risk commodities—including soy, leather and rubber—and their material significance to Target. Where necessary, we will address salient issues with relevant time-bound and measurable goals.

Quality of forest risk commodities

Relevance & inclusion

Relevant, always included

Please explain

Target considers the risk of forest commodities not meeting its quality requirements, and as such evaluates the quality of all sustainably-certified materials closely.

Impact of activity on the status of ecosystems and habitats

Relevance & inclusion

Relevant, always included

Please explain

Forests deliver irreplaceable ecosystem services that mitigate climate change, foster habitat biodiversity and offer livelihoods for communities. They also provide essential raw materials for many of the owned-brand products and packaging that bring joy to our guests. Target is committed to aiding in the global effort to end deforestation and forest degradation. We're working with vendors, suppliers and other stakeholders to implement our Responsible Sourcing Policy on Forest Products. Our goal is to progressively increase the amount of responsibly sourced fiber we use. Palm oil has been another area of focus. At the end of 2018, 38% of palm oil in owned brand products covered by our 2015 commitment was certified sustainable via the Roundtable on Sustainable Palm Oil's (RSPO's) physical certification (Mass Balance or Segregated), and the remaining 62% was covered by RSPO's PalmTrace credits. Additionally, 84% of the palm volume was traced to the importer. Target will continue to collaborate with supply chain partners and industry stakeholders to leverage our collective scale, influence and expertise to promote sustainable palm oil. We will also continue to report annually on our progress.

Regulation

Relevance & inclusion

Relevant, always included

Please explain

Like all companies, Target is subject to laws, and breach of these could result in criminal or civil lawsuits. As part of its scenario analysis on climate-related risks and opportunities, Target looked at risks relating to potential regulations on forest commodity products. Regulations relating to the production/import of key commodities could adversely affect a large number of Target owned brand products, potentially leading to increased costs or affecting Target's ability to supply products.

Climate change

Relevance & inclusion

Relevant, always included

Please explain

Target's operational presence across the US and our global supply chain lead to exposure to climate-related risks, including changes in water availability, changes in climate patterns or rising temperatures or even loss of market demand suffering from geopolitical instability in certain regions. In accordance with TCFD guidelines, transition and physical risks and opportunities associated with forest-related commodities are included in our scenario-analysis for climate impacts under both business-as-usual and low-carbon trajectories.

Impact on water security

Relevance & inclusion

Please select

Please explain

Tariffs or price increases

Relevance & inclusion

Relevant, always included

Please explain

Potential price increases for raw materials were highlighted in Target's scenario analysis for climate-related impacts. Many forest risk commodities are raw materials and packaging for Target products, and are subject to price fluctuation, especially in the case where there are price fluctuations in feedstocks. Any price increase impacts a large range of Target's products. Additionally, Target's "Responsible Sourcing Policy for Forest Products" requires that products come from certified sources where possible. Target anticipates that the growing demand from global manufacturing and retail organizations for certified products could lead to price increases for these commodities.

Loss of markets

Relevance & inclusion

Relevant, always included

Please explain

As part of its scenario analysis, Target looks at risks relating to loss of market from shifting consumer preferences. Target anticipates that consumer choices may increasingly be influenced by overall sustainability performance of companies, as customers become more conscious of issues surrounding climate change and deforestation. Failure of a company to understand and adapt to consumers' changing purchasing behaviors and to meet new expectations of the market may thus translate into reduced demand for unsustainable products. Sustainable procurement of forest related commodities and working with our suppliers to increase transparency have been highlighted as key risk mitigations in our scenario analysis to maintain current markets.

Brand damage related to forest risk commodities

Relevance & inclusion

Relevant, always included

Please explain

Target's scenario analysis for climate-related risks identified that significant reputational damage could occur from unsustainable use of resources, particularly relating to water and forest commodities. To ensure that Target is operating in line with consumer and stakeholder expectations, Target has published its "Responsible Sourcing Policy for Forest Products." Irresponsible procurement of palm oil could cause significant reputational damage, and Target recently released a new palm oil commitment. The commitment sets out goals for sustainable palm oil use and traceability. Since 2015, Target has been actively engaged in multi-stakeholder initiatives focused on sustainable palm oil. Since launching our goal in 2015, Target has partnered with Proforest, the Consumer Goods Forum, and the RSPO with aspirations of eliminating deforestation and improving the livelihoods of those in the palm oil sector.

Corruption

Relevance & inclusion

Relevant, not included

Please explain

Social impacts

Relevance & inclusion

Relevant, always included

Please explain

Target requires FPIC (free, prior and informed consent), which aims to mitigate risks of negative social impacts from forest commodities such as deforestation or effects on indigenous communities. Additionally, Target has selected the forest product certifications it uses ensuring that each has a social component.

Other, please specify

Relevance & inclusion

Please select

Please explain

F2.1c

(F2.1c) Which of the following stakeholders are considered in your organization's forests-related risk assessments?

Customers

Relevance & inclusion

Relevant, not included

Please explain

At this time Target does not include more specific data on stakeholders in the risk assessment.

Employees

Relevance & inclusion

Relevant, not included

Please explain

At this time Target does not include more specific data on stakeholders in the risk assessment.

Investors

Relevance & inclusion

Relevant, not included

Please explain

At this time Target does not include more specific data on stakeholders in the risk assessment.

Local communities

Relevance & inclusion

Relevant, not included

Please explain

At this time Target does not include more specific data on stakeholders in the risk assessment.

NGOs

Relevance & inclusion

Relevant, always included

Please explain

Target collaborates with NGOs such as the World Wildlife Fund (WWF) to assess and manage forest-related risks.

Other forest risk commodity users/producers at a local level

Relevance & inclusion

Relevant, not included

Please explain

At this time Target does not include more specific data on stakeholders in the risk assessment.

Regulators

Relevance & inclusion

Relevant, always included

Please explain

Target assesses and adheres to the regulations governing forests and commodities, such as the Lacey Act in the US.

Suppliers

Relevance & inclusion

Relevant, sometimes included

Please explain

The suppliers who produce products sold at Target stores are key stakeholders for identifying and managing forest-related risks.

Other stakeholders, please specify

Relevance & inclusion

Relevant, not included

Please explain

F3. Risks and opportunities

F3.1

(F3.1) Have you identified any inherent forests-related risks with the potential to have a substantive financial or strategic impact on your business?

	Risk identified?
Timber	Yes
Palm Oil	Yes
Cattle Products	<Not Applicable>
Soy	<Not Applicable>
Other - Rubber	<Not Applicable>
Other	<Not Applicable>

F3.1a

(F3.1a) How does your organization define substantive impact on your business?

Target considers multiple factors in evaluating risk. Target considers risks substantive when they are assessed to be high or critical using proprietary criteria. Importantly, something that has a "substantive impact on our business" is not necessarily "material" to investors as defined by the SEC.

Target's answers to this questionnaire contain forward-looking statements, which are based on our current assumptions and expectations. These statements are typically accompanied by the words "expect," "may," "could," "believe," "would," "might," "anticipates," or similar words. All such forward-looking statements are intended to enjoy the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, as amended. Although we believe there is a reasonable basis for the forward-looking statements, our actual results could be materially different. The most important factors which could cause our actual results to differ from our forward-looking statements are set forth in our description of risk factors in Item 1A of our Form 10-K for the fiscal year ended February 2, 2019, which should be read in conjunction with the forward-looking statements in this report. Forward-looking statements speak only as of the date they are made, and we do not undertake any obligation to update any forward-looking statement.

F3.1b

(F3.1b) For your disclosed forest risk commodity(ies), provide details of risks identified with the potential to have a substantive financial or strategic impact on your business, and your response to those risks.

Forest risk commodity

Timber

Type of risk

Reputational and markets

Geographical scale

Global

Where in your value chain does the risk driver occur?

Supply chain

Primary risk driver

Increased stakeholder concern or negative stakeholder feedback

Primary potential impact

Brand damage

Company-specific description

Target stakeholders (guests, investors, etc.) expect that we are acting responsibly and have oversight of our supply chain as related to timber. Upon discovery that we have not completed our due diligence in this endeavor, we can expect significant brand and/or reputational damage. We support responsibly managed forests, and to that end, introduced our new Responsible Sourcing Policy on Forest Products in 2017. This policy helps us toward our long-term intention that all wood, paper, paper-based packaging and wood-based fiber used in the products we purchase and sell is sourced from well-managed forests that have been credibly certified and/or are from post-consumer recycled materials. We are starting with owned brand products containing wood or paper-based materials, like tissues and paper towels, wrapping paper, furniture and rayon used in apparel, which comes from wood pulp. Then we plan to work on sourcing our owned-brands' packaging from sustainably managed forests. By the end of fiscal year 2018, we expect that our party supplies brand, Spritz, will be our first owned brand to be fully compliant with our forest products policy. In 2017, the Spritz team started introducing Forest Stewardship Council (FSC) Chain-of-Custody certification and is on track to meet this goal. We have also committed to making our up&up, Pillowfort and Cat & Jack brands fully compliant with our forest products policy by 2020, and Threshold and Smith & Hawken fully compliant by 2022.

F4. Governance

F4.1

(F4.1) Does your organization have a policy that includes forests-related issues?

Yes, we have a documented forests policy that is publicly available

F4.1a

(F4.1a) Select the options to describe the scope and content of your policy.

	Scope	Content	Please explain
Row 1	Selected products only	Commitment to eliminate deforestation and/or conversion Commitment to eliminate forests degradation Commitment to protect rights and livelihoods of local communities Commitment to stakeholder awareness and education List of timebound commitments and targets Reference to international standards and widely-recognized forests-related initiatives	Target will work actively with its vendors, suppliers, and other stakeholders to implement our policy by eliminating any unacceptable sources, and progressively increasing the amount of responsible wood, paper, paper-based packaging and wood-based fiber over time. For more information, please see our Corporate site: https://corporate.target.com/corporateresponsibility/planet/deforestation .

F4.1b

(F4.1b) Do you have commodity specific sustainability policy(ies)? If yes, select the options that best describe their scope and content.

	Do you have a commodity specific sustainability policy?	Scope	Content	Please explain
Timber	Yes	Selected products only	Commitment to eliminate deforestation and/or conversion Commitment to protect rights and livelihoods of local communities Commitments beyond regulatory compliance Recognition of the overall importance of forests and other natural habitats List of timebound commitments and targets Reference to international standards and widely-recognized forests-related initiatives	Target believes that use of post-consumer recycled and alternative (non-wood) fibers should be increased to reduce the pressure on forests. Target aims to increase the use of recycled materials in our owned brand products and packaging when available and meeting product performance requirements and competitive market conditions. Read more about Target's work in this space by reviewing the Forest Products section of our corporate website (LINK: https://corporate.target.com/corporateresponsibility/planet/sustainable-products).
Palm Oil	Yes	Selected products only	Commitment to eliminate deforestation and/or conversion Commitment to protect rights and livelihoods of local communities Commitment to transparency Description of forest risk commodities, parts of the business, and stages of value-chain covered by the policy List of timebound commitments and targets Reference to international standards and widely-recognized forests-related initiatives	Read more about Target's work in this space by reviewing the Palm Oil section of our corporate website (LINK: https://corporate.target.com/corporate-responsibility/planet/deforestation).

F4.2

(F4.2) Is there board-level oversight of forests-related issues within your organization?

Yes

F4.2a

(F4.2a) Identify the position(s) of the individual(s) (do not include any names) on the board with responsibility for forests-related issues.

Position of individual	Please explain
Board-level committee	Target's Board of Directors retains oversight responsibility over the Corporation's key strategic risks including those relating to corporate responsibility matters. The Nominating & Governance Committee of the Board of Directors has overall oversight responsibility over corporate responsibility matters. Target recognizes that environmental, social and governance issues are of increasing importance to many investors. The Vice President of Corporate Responsibility and the Corporate Responsibility team work with functional leaders across the company to determine strategies, policies and goals related to sustainability and regularly report to and seek input from the Nominating & Governance Committee on those matters, including forests-related issues.

F4.2b

(F4.2b) Provide further details on the board's oversight of forests-related issues.

	Frequency that forests-related issues are a scheduled agenda item	Governance mechanisms into which forests-related issues are integrated	Please explain
Row 1	Scheduled - some meetings	Monitoring implementation and performance Reviewing and guiding corporate responsibility strategy Reviewing and guiding major plans of action Reviewing and guiding risk management policies Reviewing and guiding strategy	The Board of Directors' review of environmental and social topics is obtained through the updates it receives from the Nominating and Governance Committee. The Nominating and Governance Committee reviews environmental and social topics at least semi-annually. This happens independently of our financial reporting process, which includes economic topics, and is overseen throughout the year by the Audit and Finance Committee, which provides regular reports to the Board of Directors. Target's Vice President of Corporate Responsibility presents to the Nominating and Governance Committee semi-annually on corporate responsibility related topics.

F4.3

(F4.3) Provide the highest management-level position(s) or committee(s) with responsibility for forests-related issues (do not include the names of individuals).

Name of the position(s) and/or committee(s)	Responsibility	Frequency of reporting to the board on forests-related issues	Please explain
Chief Sustainability Officer (CSO)	Both assessing and managing forests-related risks and opportunities	As important matters arise	The Vice President of Corporate Responsibility oversees corporate responsibility across Target. They report to the Executive Vice President and Chief Marketing Officer at Target.

F4.4

(F4.4) Do you provide incentives to C-suite employees or board members for the management of forests-related issues?

No, and we do not plan to introduce them in the next two years

F4.5

(F4.5) Did your organization include information about its response to forests-related risks in its most recent mainstream financial report?

No, and we have no plans to do so

F5. Business strategy

F5.1

(F5.1) Are forests-related issues integrated into any aspects of your long-term strategic business plan, and if so how?

	Are forests-related issues integrated?	Long-term time horizon (years)	Please explain
Long-term business objectives	Yes, forests-related issues are integrated	5-10	Please reference the following links: https://corporate.target.com/corporate-responsibility/planet/deforestation Target's Forest Products Policy: https://corporate.target.com/_media/TargetCorp/csr/pdf/Target-Forest-ProductsPolicy.pdf Target's Palm Oil commitments: https://corporate.target.com/corporate-responsibility/planet/deforestation
Strategy for long-term objectives	Yes, forests-related issues are integrated	5-10	Please reference the following links: https://corporate.target.com/corporate-responsibility/planet/deforestation Target's Forest Products Policy: https://corporate.target.com/_media/TargetCorp/csr/pdf/Target-Forest-ProductsPolicy.pdf Target's Palm Oil commitments: https://corporate.target.com/corporate-responsibility/planet/deforestation
Financial planning	Yes, forests-related issues are integrated	5-10	Target has included cost impacts due to increased raw material costs from converting our supply chain to more certified forest products in the company's financial planning processes.

F6. Implementation

F6.1

(F6.1) Has your organization made a public commitment to reduce or remove deforestation and/or forest degradation from its direct operations and/or supply chain?

Yes

F6.1a

(F6.1a) Has your organization endorsed any of the following initiatives as part of its public commitment to reduce or remove deforestation and/or forest degradation?

Other, please specify (Canopy)

F6.1b

(F6.1b) Provide details on your public commitment(s), including the description of specific criteria, coverage, and actions.

Commodity coverage

Timber

Criteria

- No conversion of natural habitats
- No forest degradation
- No new development on peatland
- No conversion of High Conservation Value areas
- No conversion of High Carbon Stock forests
- No sourcing of illegally produced and/or traded forest risk commodities

Operational coverage

Supply chain

% of total production/ consumption covered by commitment

91-99%

Cutoff date

2018

Commitment timeframe

2021-25

Please explain

The percentage covered (91-99%) is the percentage of owned-brand production, which is the scope of this disclosure.

Commodity coverage

Palm Oil

Criteria

- No new development on peatland
- Adoption of Free, Prior and Informed Consent (FPIC) principles
- Restricting the sourcing and/or trade of forest risk commodities to credible certified sources

Operational coverage

Supply chain

% of total production/ consumption covered by commitment

91-99%

Cutoff date

2015

Commitment timeframe

2018

Please explain

Target has engaged with suppliers and participated in initiatives to increase the sustainability of its palm oil supply chain over the past five years. Target is pleased to report that at the end of 2018, 38% of palm oil in owned-brand products covered by our 2015 commitment was certified sustainable via the Roundtable on Sustainable Palm Oil's (RSPO's) physical certification (Mass Balance or Segregated), and the remaining 62% was covered by RSPO's PalmTrace credits. Additionally, 84% of the palm volume was traced to the importer. As a next step in Target's multi-year endeavor to responsibly source palm oil, Target commits to moving beyond the use of a credit system toward the use of physically certified palm oil. Our goal is for palm oil in our owned brand products to be certified by the Roundtable on Sustainable Palm Oil (RSPO) or an equivalent standard with a mass balance, segregated, or identity preserved supply chain certification by the end of 2022. Target also aims to increase the portion of segregated and identity preserved palm oil used in its owned brand products over time. Target aims to trace its palm oil supply chain to the mill level by the end of 2022. The percentage covered (91-99%) is the percentage of owned-brand production, which is the scope of this disclosure.

F6.2

(F6.2) Did you have any quantified targets for increasing sustainable production and/or consumption of your disclosed commodity(ies) that were active during the reporting year?

Yes

F6.2a

(F6.2a) Provide details of your target(s) for increasing sustainable production and/or consumption of the disclosed commodity(ies), and progress made.

2018 was a year of acceleration into the finish line for the Spritz brand. Working towards the goal, we utilized FSC certification across all product categories within the Brand. We fell just short of meeting the goal primarily due to the availability of FSC-certified materials. Going forward we will be looking for solutions to fill these final gaps in supply of FSC-certified materials.

Please explain

We continue to work closely with our owned-brand vendor base to meet our goal. 38% of palm oil in products covered by our commitment was certified sustainable via the Roundtable on Sustainable Palm Oil's (RSPO's) physical certification (Mass Balance or Segregated), and the remaining 62% was covered by RSPO's PalmTrace credits. Target continues to engage its vendors on the implementation of Target's responsible palm oil sourcing commitment through a biannual survey to determine the volume of palm oil and palm kernel oil used in the owned-brand products covered by its commitment, including the percentage that is certified as sustainable, classified across PalmTrace Credits, Mass Balance and Segregated. Our commitment covers palm volumes purchased directly by our vendors for use in owned-brand products, vendors that source palm oil indirectly through finished product components and vendors that source palm oil and kernel derivatives in household and personal care products. In 2018, Target: • Continued collecting and validating volume and traceability data from all vendors, including supplier engagement and active follow-up, with our partner, Proforest; • Engaged with key importers into the U.S. market on traceability; • Engaged critical vendors

regarding their path toward Target policy compliance; • Supported vendors/suppliers on process to deliver certified products; • Shared tools, training materials and guidance documents to aid commitment implementation; and • Participated in the Roundtable on Sustainable Palm Oil's North American Sustainable Palm Oil Network, designed to facilitate cross-sector work in a pre-competitive space on the sourcing of Certified Sustainable Palm Oil (CSPO) in North America, foster collaboration and impact programs in producing nations and share best practices. 2,214 tons of palm oil, palm kernel oil, and derivatives were used in products covered in our commitment. Of that, 1,364 tons were Book and Claim, 821 tons were Mass Balance, and 29 tons were Segregated.

F6.5

(F6.5) Do you specify any sustainable production/procurement standards for your disclosed commodity(ies), other than third-party certification? Indicate the percentage of production/consumption covered and if you monitor supplier compliance with these standards.

F7. Linkages and trade-offs

F7.1

(F7.1) Has your organization identified any linkages or trade-offs between forests and other environmental issues in its direct operations and/or other parts of its value chain?

Yes

F7.1a

(F7.1a) Describe the linkages or trade-offs and the related management policy or action.

Linkage/tradeoff

Linkage

Type of linkage/tradeoff

Decreased GHGs emissions

Description of linkage/tradeoff

We recognize that one of many devastating effects of deforestation is its contribution to climate change. Trees remove carbon dioxide, and when they are cut down we lose not only the value of carbon capture, but those trees also release stored carbon.

Policy or action

We introduced a climate policy and goals to address emissions across our supply chain, which aim to reduce our absolute Scope 1, 2 and 3 greenhouse gas emissions by 30 percent below 2017 levels by 2030, as well as help 80 percent of our suppliers set science-based reduction targets on their Scope 1 and 2 emissions by 2023. These goals are approved by the Science-Based Targets initiative, and build on our commitments to source 100% renewable energy and improve energy efficiency in our domestic operations.

Linkage/tradeoff

Linkage

Type of linkage/tradeoff

Increased water quality

Description of linkage/tradeoff

Water is one of our world's most critical natural resources. Deforestation and forest degradation have had negative impacts on many global watersheds and a decline in water quality and quantity around the globe. As we believe that clean, drinkable water and sanitation are human rights and should be accessible for all, we recognize the interdependence of clean water and forests.

Policy or action

In acting as stewards of freshwater, we recognize our current and future efforts to end deforestation are directly related to our water efforts.

F8. Verification

F8.1

(F8.1) Do you verify any forests information reported in your CDP disclosure?

Yes

F8.1a

(F8.1a) Which data points within your CDP disclosure have been verified, and which standards were used?

F9. Barriers and challenges

F9.1

(F9.1) Describe the key barriers or challenges to avoiding forests-related risks in your direct operations or in other parts of your value chain.

Forest risk commodity

Timber

Coverage

Supply chain

Primary barrier/challenge type

Supply chain complexity

Comment

Our primary challenge is that we rely upon the remainder of our supply chain partners when impacting change through policies and goals. As a retailer, we rarely have visibility beyond our first tier of suppliers, let alone control over sourcing, procurement, or manufacturing processes beyond what we specify for a finished product. Additionally, since we don't source these commodities directly, and we only use them in small amounts, we're at the mercy of others to collect accurate data and information. Due to these facts, we also have some reliance upon certification, which is often more expensive, laborious and difficult to achieve for our suppliers. Finally, as a mass retailer active in many categories of consumer goods, our supply chain is wide and shallow, meaning we have many vendor partners with small amounts of business, thus making data collection, enforcement of policies and impact on deforestation difficult to achieve.
