

reconciliation of non-GAAP EBIT and EBITDA

quarterly, fiscal 2020 to present

Background

We have presented earnings before interest expense and income taxes (EBIT) and earnings before interest expense, income taxes, depreciation, and amortization (EBITDA) as non-GAAP financial measures. We believe these measures provide meaningful information about our operational efficiency compared with our competitors by excluding the impact of differences in tax jurisdictions and structures, debt levels, and, for EBITDA, capital investment. These measures are not in accordance with, or an alternative to, generally accepted accounting principles in the United States (GAAP). The most comparable GAAP measure is net earnings. EBIT and EBITDA should not be considered in isolation or as a substitution for analysis of our results as reported in accordance with GAAP. Other companies may calculate EBIT and EBITDA differently, limiting the usefulness of the measures for comparisons with other companies.
