Welcome to your CDP Forests Questionnaire 2023

F0. Introduction

F0.1

(F0.1) Give a general description of and introduction to your organization.

Target Corporation (Target, the Corporation, or the Company) was incorporated in Minnesota in 1902. Our corporate purpose is to help all families discover the joy of everyday life. We offer to our customers, referred to as "guests," everyday essentials and fashionable, differentiated merchandise at discounted prices. We operate as a single segment designed to enable guests to purchase products seamlessly in stores or through our digital channels. Since 1946, we have given 5 percent of our profit to communities. Our team, technology, and operations enable us to serve guests, fulfil our purpose, and drive business results through a durable, growth-focused enterprise strategy that differentiates Target in the marketplace.

The six pillars of our strategy are:

• Differentiating from our competition with our assortment of unique owned brands and curated leading national brands;
• Investing to create an engaging, convenient, safe, and differentiated shopping experience for our guests;
• Leveraging our stores as fulfilment hubs to efficiently meet our guests' needs, whether they purchase online or in-store;
• Engaging with our guests through programs like Target Circle and RedCard to maintain and enhance our relevancy;
• Delivering affordability to our guests; and
• Leveraging our size and scale to benefit people, the planet, and our business, primarily through Target Forward, our enterprise sustainability strategy.

Target's definition for net zero emissions is: Achieved when a company's Scope 1, 2, and 3 emissions are reduced to a level that is consistent with a 1.5°C pathway and any residual emissions are removed from the atmosphere through either nature-based or technological carbon removal solutions (e.g., forestry, regenerative agriculture, carbon capture technology), by no later than 2050. Target has committed to being a Net Zero enterprise by 2040 – zero waste to landfill in US operations and net zero emissions across both our operations and supply chain, inclusive of Scope 1, 2 and 3. Target’s responses in this report on matters that relate to the degree of risk or impact should not be viewed as an indication that such risks or impacts could be “material” as such term is used for SEC reporting purposes. Target’s responses to this questionnaire contain forward-looking statements, which are based on our current assumptions and expectations. These statements are typically accompanied by the words "commit," "seek," "expect," "may," "could," "believe," "would," "might," "anticipates" or
similar words. The principal forward-looking statements in this report include our sustainability goals, commitments and programs; our business plans, initiatives and objectives; our assumptions and expectations; the scope and impact of corporate responsibility risks and opportunities; and standards and expectations of third parties. All such forward-looking statements are intended to enjoy the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, as amended. Although we believe there is a reasonable basis for the forward-looking statements, our actual results could be materially different. The most important factors that could cause our actual results to differ from our forward-looking statements are set forth in our description of risk factors included in Part I, Item 1A, Risk Factors of our Form 10-K for the fiscal year ended January 28, 2023, which should be read in conjunction with the forward-looking statements in this report. Forward-looking statements speak only as of the date they are made, and we do not undertake any obligation to update any forward-looking statement.

F0.2

(F0.2) State the start and end date of the year for which you are reporting data.

<table>
<thead>
<tr>
<th>Start Date</th>
<th>End Date</th>

**F0.5**

(F0.5) Select the option that describes the reporting boundary for which forests-related impacts on your business are being reported

- Operational control

**F0.6**

(F0.6) Select the countries/areas in which you operate.

- United States of America

**F0.7**

(F0.7) Are there any parts of your direct operations or supply chain that are not included in your disclosure?

- Yes

**F0.7a**

(F0.7a) Identify the parts of your direct operations or supply chain that are not included in your disclosure.

- Forest risk commodity: Palm oil
- Value chain stage: Direct operations
- Exclusion: Specific product line(s)
- Description of exclusion
We have a curated selection of National Brands, Owned Brands, and exclusive National Brands that we sell to our guests. At this time, we do not disclose national brands product lines.

**% of volume excluded**
- Don't know

**Potential for forests-related risk**
- Potential for forests-related risk but not evaluated

**Please explain**
- We do not have direct influence and data knowledge into our national brands forest-related risks but we know that we sell national brand products that contain palm oil, timber, soy, cattle products, and more forest-related commodities

### F0.8

**(F0.8) Does your organization have an ISIN code or another unique identifier (e.g., Ticker, CUSIP, etc.?)**

<table>
<thead>
<tr>

**Please explain**

United States is not available in the drop down. These countries represent the point of manufacture for final goods. Not the point of forest origin. Consumption only represents Target branded product use of regenerated cellulose fiber. Wood and paper consumption is not yet available due to inability to accurately measure material consumption in mixed material products outside of apparel. These calculations are based on order quantities, item weights and item material mix. This data is readily available in our apparel businesses. We require all owned brand suppliers to adhere to the Canopy pledge for regenerated cellulose fibers. Canopy audits help ensure that fiber producers are not sourcing from ancient and endangered forests as well as causing deforestation.

Known or estimated deforestation/conversion footprint (hectares)

Describe methods and data sources used to monitor or estimate deforestation/conversion footprint

F2. Procedures

F2.1

(F2.1) Does your organization undertake a forests-related risk assessment?

Yes, forests-related risks are assessed

F2.1a

(F2.1a) Select the options that best describe your procedures for identifying and assessing forests-related risks.

Timber products

Value chain stage
Supply chain

Coverage
Partial

Risk assessment procedure
Assessed in an environmental risk assessment

Frequency of assessment
Not defined

How far into the future are risks considered?
1 to 3 years

Tools and methods used
External consultants

Issues considered
Impact of activity on the status of ecosystems and habitats

Stakeholders considered
NGOs
Suppliers

Please explain
Risk assessments we have performed have been used to determine compliance with our Forest Products policy when uncertified materials are being used. The risk assessment was desktop/paperwork based and supported by Preferred By Nature. The goal was to determine forest management practices at the beginning of the supply chain. This was by no means an exhaustive risk assessment, the primary purpose was to understand the challenges in supply chain mapping as well as document collection and validation in a select portion of our product assortment. The results were inconclusive as we found that field validation is necessary to fill the gaps in documentation. At this time, we do not have plans to perform field validation of this risk assessment. Our primary tool for risk assessment remains 3rd party certifications.

Palm oil

Value chain stage
Supply chain

Coverage
Partial

Risk assessment procedure
Assessed in an environmental risk assessment

Frequency of assessment
Every two years

How far into the future are risks considered?
1 to 3 years

**Tools and methods used**
- Internal company methods
- External consultants
- Sustainability Policy Transparency Toolkit (SPOTT)
- Jurisdictional/landscape assessment

**Issues considered**
- Availability of forest risk commodities
- Quality of forests risk commodities
- Impact of activity on the status of ecosystems and habitats
- Regulation
- Climate change
- Social impacts

**Stakeholders considered**
- Customers
- Employees
- Investors
- Local communities
- NGOs
- Other forest risk commodity users/producers at a local level
- Regulators
- Suppliers

**Please explain**
Our risk assessment procedure includes working with our consultant, Earthworm Foundation to trace palm oil to a mill and then overlay that data with outstanding grievances associated with those mills. We chose both “internal company methods” and “external consultants” as tools used because we survey suppliers internally, compile that data and overlay it with Earthworm Foundation’s internal data sets.

We consider the impact of activity on the status of ecosystems and habitats to be the most significant to Target.

We currently only retain partial coverage of data because we do not include national brands as part of this work.

**F2.2**

**(F2.2) For each of your disclosed commodity(ies), has your organization mapped its value chains?**

<table>
<thead>
<tr>

<td>Yes</td>
</tr>
</tbody>
</table>

**F3.1a**

*(F3.1a) How does your organization define substantive financial or strategic impact on your business?*

We consider multiple factors in evaluating risk. Importantly, something that has a "substantive financial or strategic impact on our business" is not necessarily "material" to investors as defined by the Securities and Exchange Commission (SEC). In the context of climate-related issues and this response, Target leverages both the TCFD framework and our internal Enterprise Risk Management Framework. We consider a number of factors including, but not limited to: financial, team, guest, operations, and reputation impact; likelihood of potential events occurrence over time; and our ability to mitigate potential risks.

**F3.1b**

*(F3.1b) For your disclosed forest risk commodity(ies), provide details of risks identified with the potential to have a substantive financial or strategic impact on your business, and your response to those risks.*

---

**Forest risk commodity**

- Timber products

**Type of risk**

- Reputational and markets

**Geographical scale**

- Global

**Where in your value chain does the risk driver occur?**

- Supply chain
Primary risk driver
Increased stakeholder concern or negative stakeholder feedback

Primary potential impact
Brand damage

Company-specific description
Target stakeholders (guests, investors, etc.) expect that we are acting responsibly and have oversight of our supply chain as related to timber. If there were a discovery that we had not completed our due diligence in this endeavor, we would expect significant brand and/or reputational damage. We support responsibly managed forests, and to that end, introduced our Responsible Sourcing Policy for Forest Products in 2017. This policy helps us on our long-term intention that all wood, paper, paper-based packaging, and wood-based fiber used in the products we purchase and sell is sourced from well-managed forests that have been credibly certified and/or are from post-consumer recycled materials. We are starting with owned brand products containing wood or paper-based materials, like paper towels, wrapping paper, furniture, and rayon used in apparel.

Timeframe
1-3 years

Magnitude of potential impact
Medium-low

Likelihood
Unlikely

Are you able to provide a potential financial impact figure?
Yes, an estimated range

Potential financial impact (currency)

Potential financial impact figure - minimum (currency)

Potential financial impact figure - maximum (currency)

Explanation of financial impact
Financial impact is most apparent when considering risk mitigation measures related to supplier engagement. It may be possible to determine the financial impact related to certification status of products, but that analysis has not been performed due to the significantly manual nature of determining cost impact at the item level.

Primary response to risk
Engagement with suppliers

Description of response
Our primary approach to mitigating risk in forest product supply chains is to use 3rd party certifications. We report against this progress publicly in our annual ESG report as a percentage in compliance. Uncertified forest products remain a risk, thus our approach is to continue conversion of any uncertified materials to certified. This approach to risk mitigation is only as good as the certifications we use. Which is why we have a preference for FSC certification, but also use SFI and PEFC when needed

**Cost of response**

100,000

**Explanation of cost of response**

The financial impact of this work is difficult to quantify outside of some specific examples where 3rd party consultants were paid for support to analyze and mitigate risk. Financial impact comes in many forms: additional verification efforts, vendor training and support, some increases in raw material costs across a wide variety of vendors and wood-based materials. Forest policy implementation exceeds $100,000 per year when considering all of these factors.

---

**Forest risk commodity**

Palm oil

**Type of risk**

Reputational and markets

**Geographical scale**

Global

**Where in your value chain does the risk driver occur?**

Supply chain

**Primary risk driver**

Increased stakeholder concern or negative stakeholder feedback

**Primary potential impact**

Brand damage

**Company-specific description**

Target stakeholders (guests, investors, etc.) expect that we are acting responsibly and have oversight of our supply chain as related to palm oil. If there were a discovery that we had not completed our due diligence in this endeavor, we would expect significant brand and/or reputational damage. To address this risk, Target requires owned brand suppliers of Food & Beverage, Essentials & Beauty, and Candles covered by our palm oil commitment to supply palm oil ingredients that comply with by one of the four RSPO trading models (Book and Claim, Mass Balance, Segregated, or Identity Preserved). In 2022, our certification breakdown was 6% identity preserved, 15% segregated, 56% mass balance, and 12% Book & Claim. Target will continue to collaborate with companies in our supply chain and industry stakeholders to leverage our collective
scale, influence and expertise to promote sustainable palm oil. We will also continue to report annually on our progress.

**Timeframe**
1-3 years

**Magnitude of potential impact**
Medium-low

**Likelihood**
Unlikely

**Are you able to provide a potential financial impact figure?**
No, we do not have this figure

**Potential financial impact (currency)**

**Potential financial impact figure - minimum (currency)**

**Potential financial impact figure - maximum (currency)**

**Explanation of financial impact**
The impact has not been quantified financially

**Primary response to risk**
Engagement with suppliers

**Description of response**
Target continuously engages with our suppliers to ensure they are using sustainably sourced palm oil. We engage with any supplier who is not in compliance with our sustainable palm oil expectations. Engagements with suppliers include, but not limited to, training on Target's palm oil commitment and annual surveys.

**Cost of response**

**Explanation of cost of response**
Cost of response not quantified at corporate level

Company-specific description
In 2017 Target launched an Owned Brand Forest Products policy. This policy impacts a wide variety of Target’s businesses and therefore a large number of products as well as the factories in which they are produced. Ensuring that the policy is met is first and foremost a communications and education challenge across Target team members as well as suppliers. This is particularly challenging for a mass retailer that does not own factories and must create change through product specifications, even when those purchases may not represent a significant portion of a factory’s business. Suppliers have well established supply chains and converting those supply chains to certified takes a significant amount of work and change.

Since the launch of Target’s forest products policy, our team has been working with suppliers to grow the number of factories that are capable of producing FSC certified products. Certification requires that factories become independently audited to ensure that the FSC standard is being met. This certification allows the factory sell Target FSC certified finished goods.

Target has provided educational resources for any vendors interested. A series of training videos were created to help vendors understand the requirements of certification. These 10 videos provide 2.5 hours of training videos and documents to help vendors through the certification process. The documents have been translated to Mandarin to reach a broader supplier base. Additionally our team members in sourcing and product development are becoming much more adept at designing into and around the challenges presented by the change to certified materials.

Estimated timeframe for realization
1-3 years
Magnitude of potential impact
Medium-low

Palm oil

Type of opportunity
Markets

Where in your value chain does the opportunity occur?
Supply chain

Primary forests-related opportunity
Increased demand for certified materials

Company-specific description
As a retailer purchasing goods from manufacturers, we are able to use our leverage to create demand for certified materials. To that end, we are using our purchasing of owned brand products to increase demand from our suppliers for palm oil that is produced more sustainably and increase our level of transparency. In 2019, Target announced a new Palm Oil Sustainability Commitment with two specific ambitions: 1) All owned brand suppliers would be Roundtable on Sustainable Palm Oil (RSPO) physically certified products by the end of 2022 2) We are working to trace all palm oil to mill by the end of 2022. In addition to these more ambitious goals, the new commitment covered a much broader array of products across the food and beverage, essentials and beauty,
and candles divisions to ensure we were actively engaging with all of the areas of store that have notable palm oil usage.

Achieving these goals required working with our internal teams and suppliers in three distinct parts of the business, each representing a variety of different industries: food, beverage, household cleaning, personal care, baby care, beauty, cosmetics, and candles.

Beginning in 2018, our teams have been educating our vendors on the requirements of certification and supporting them through the process of getting certified. As we engaged in the traceability to mill level work, the Target team as well as our partners at the Earthworm Foundation provided regular technical support to our suppliers. The vast majority of our suppliers were not being asked to provide this level of data to their other retail customers which increased the level of complexity for them to get access to the date we requested. These suppliers now have this level of data available which we hope will help to boost the level palm traceability in the North American market.

**Estimated timeframe for realization**

Materials & Deforestation _ Target.pdf

Please explain
Timber: Target recognizes that the ecosystem services provided by forests around the world are irreplaceable. Forests are critical to mitigating climate change, providing a carbon sink, fostering habitat for biodiversity, protecting water supplies, providing livelihoods for communities, and are a renewable resource for products and packaging throughout our supply chain. We commit to working with our owned brand suppliers to protect forests by eliminating deforestation and forest degradation from our value chain. More specifically, we will focus on eliminating deforestation of primary forests and areas of High Conservation Value, as well as High Carbon Stock forest areas and peatlands (regardless of depth). As a retailer with a wide variety of products, we understand the responsibility we have to protect forests around the world. We are committed to aiding in the global effort to end deforestation and forest degradation, and focus our efforts in the places we can have the most positive impact today – specifically palm oil and wood-based materials. We are committed to sustainably sourcing wood, paper, and wood-based fibers in our priority owned brands; palm in all of our owned brands; and wood-based fibers in our owned brand packaging. We will build on our existing priority raw material commitments by evaluating high-risk commodities – including soy, leather, and rubber – and their material significance to Target. Our policy does not currently cover National Brand products as we have the greatest insight as well as influence over our owned-brand portfolio and supply chain.

Palm oil: This commitment applies to palm oil, palm kernel oil, and derivatives in Target’s owned brand food, household cleaning, personal care, baby care, beauty, cosmetics, and candle products. We plan to update this policy in 2023. As a next step in Target’s multi-year endeavor to responsibly source palm oil, Target commits to
moving beyond the use of a credit system toward the use of physically certified palm oil. Our goal is for palm oil in our products to be certified by the Roundtable on Sustainable Palm Oil (RSPO) or an equivalent standard.

F4.6

(F4.6) Has your organization made a public commitment to reduce or remove deforestation and/or forest degradation from its direct operations and/or supply chain?

2026-2030

Please explain
The scope of this disclosure covers Target’s Owned Brands. Our goal is to have the following brands meeting the policy by end of 2022: (Spritz, Cat&Jack, up&up, Threshold, Smith&Hawken, Pillowfort). After that date, we are expanding the goal as part of our commitment to make all Leading Materials recycled, regenerative or sustainably sourced by 2030. This broader goal will help hold the progress we have made while also expanding to all brands. This approach was utilized to help us make progress on our largest wood and paper product brands while also learning how to scale up the approach to all Owned Brands.

Forest risk commodity

2021-25

Please explain
Target has engaged with suppliers and participated in initiatives to increase the sustainability of its palm oil supply chain over the past 7 years. Target also aims to increase the portion of segregated and identity preserved palm oil used in its owned brand products over time.
## F5. Business strategy

### F5.1

**(F5.1) Are forests-related issues integrated into any aspects of your long-term strategic business plan, and if so how?**

<table>
<thead>
<tr>
<th>Long-term business objectives</th>
<th>Are forests-related issues integrated?</th>
<th>Long-term time horizon (years)</th>
<th>Please explain</th>
</tr>
</thead>
</table>
| Long-term business objectives | Yes, forests-related issues are integrated | 5-10                          | Timber: The 5-10 year time horizon was chosen to align with our 2030 leading materials goal. Which includes wood and paper.
Responsible Sourcing & Sustainability is an integral part of Target’s business strategy. In 2016, we launched our 2020 Responsible Sourcing Aspirations which included a commitment to sustainably managed forests and palm oil. At Target, we also understand that our guest expects sustainable forest products. One way we communicate this commitment is by being an FSC trademark license holder. The FSC trademark license allows Target to use the Forest Stewardship Council’s logo in marketing (on Target.com, in store, and in our weekly ad) to both support FSC’s approach to sustainable forestry as well as to help educate our guest about sustainable forest management. The use of the FSC logo in marketing is supported across Target’s owned brands and appears on over 1,500 of products at Target.

Palm oil: Responsible Sourcing & Sustainability is an integral part of Target’s business strategy. In 2016, we launched our 2020 Responsible Sourcing Aspirations which included a commitment to sustainably managed forests and palm oil. At Target, we also understand that our guest expects sustainable forest products. On the palm oil side, we require that all owned brand products are physically certified by RSPO and are aiming to increase the percentage of palm oil that is Segregated or Identity Preserved from there. We selected this time horizon because we sought to balance the scarcity of physically certified sources in the North American market for certain ingredients with an ambitious target that would create a demand signal for the industry. |
Please reference the following links:

Target’s Palm Oil commitments: https://corporate.target.com/sustainability-esg/environment/materials-and-deforestation/palm-oil

| Strategy for long-term objectives | Yes, forests-related issues are integrated | 5-10 | Our palm oil strategy is to commit to time bound goals to achieve greater levels of sustainability through the RSPO certification program, work with suppliers to meet our palm oil commitment, and engagement in NASPON to support the further progress of sustainable palm oil in the North American market.

Please reference the following links

Target’s Palm Oil commitments: https://corporate.target.com/corporate-responsibility/planet/deforestation/palm-oil-commitment

| Financial planning | Yes, forests-related issues are integrated | 5-10 | Target has included cost impacts due to increased raw material costs from converting our supply chain to more certified forest products in the company’s financial planning processes.

F6. Implementation

Palm oil

Procedure to ensure legal compliance

We require that all of our suppliers are in compliance with the legal compliance principles that are part of the RSPO standard. Our suppliers must demonstrate their compliance with the following principles through our annual survey. Palm oil cultivation must not cause deforestation of primary forests, areas of High Conservation Value or High Carbon Stock forest areas. Palm oil developments must not be planted on peat lands regardless of depth. Land prepared for the planting or replanting of palm trees must not be prepared by burning. Palm oil developments must proceed on the basis of Free, Prior, and Informed Consent. Workers, including women and migrant workers, must be provided wages, benefits, and working conditions that are fair and in accordance with local law. Suppliers must provide a safe and healthy working environment that complies with local laws and minimizes occupational hazards. All workers have the right to engage in work willingly, without surrendering identification and without the payment of fees. Suppliers must comply with all age-related working restrictions as set by local law and adhere to international standards as defined by the International Labor Organization regarding age-appropriate work.

Types of partners engaged in the initiative design and implementation

- National government
- Subnational government
- International civil society organization(s)
- National civil society organization(s)
- Local civil society organization(s)
- Financial institution(s)
- Local forest/rural associations
- Indigenous peoples
- Local communities
- Local producers/smallholder
- International company(ies)
- National/local company(ies)
- Direct supplier(s)
- Indirect supplier(s)
- Academics/ researchers
- External consultants
- Workers union(s)

Type of engagement

- Partner: Shared responsibility in the implementation of multiple goals
- Supporter: Implement activities to support at least one goal
- Funder: Provides full or partial financial support

Goals supported by engagement

- Improved rate of carbon sequestration (e.g., through restoration)
- Avoided deforestation/conversion of natural ecosystems and/or decreased degradation rate
- Increased and/or maintained protected areas
- Natural ecosystems conserved and/or restored
- Promotion of transparency, participation, inclusion, and coordination in landscape policy, planning, and management
- Governance forums that represent all relevant stakeholders in place and maintained
- Respect, protect, and fulfil human rights
- Rights to land and resources recognized and protected, and related conflicts reduced
- Improved standard of living, especially for vulnerable and/or marginalized groups
- Reliable commodity traceability and landscape monitoring/data collection system(s)

Company actions supporting approach

- Other, please specify
  - Funding projects in our supplier regions)

Description of engagement
We contribute funding and partnership to Earthworm to aid in the implementation of community-based palm oil engagements in Riau, Indonesia and the South Central Forest Spine in Malaysia. Both of which are within our supply chain regions.

**Engagement start year**
2021

**Engagement end year**
Please specify
2025

**Estimated investment over the project period (currency)**

**Is a collective monitoring framework used to measure progress?**
Yes, progress is collectively monitored using a shared external framework, please specify

**State the achievements of your engagement so far, and how progress is monitored**
Progress is monitored and reported on quarterly by the local teams from the Earthworm Foundation running each initiative.

Roundtable on Sustainable Palm Oil (RSPO)

Please explain

In 2017, Target joined the Roundtable on Sustainable Palm Oil’s North American Sustainable Palm Oil Network, designed to facilitate cross-sector work in a pre-competitive space on the sourcing of Certified Sustainable Palm Oil (CSPO) in North America, foster collaboration, an impact programs in producing nations and share best practices. Target is also part of NASPON’s working group focused on human rights in palm oil supply chains.

F6.12

(F6.12) Is your organization supporting or implementing project(s) focused on ecosystem restoration and long-term protection?

Yes

F6.12a

(F6.12a) Provide details on your project(s), including the extent, duration, and monitoring frequency. Please specify any measured outcome(s).
Project reference
Project 1

Project type
Other, please specify
Forest ecosystem restoration, peatland protection & restoration, reforestation, natural regeneration, soil carbon sequestration, agriculture

Expected benefits of project
More inclusive, transparent, and empowering governance processes
Net gain in biodiversity and ecosystem integrity
Protection of human rights
Protection of land tenure
Reduce/halt biodiversity loss
Reduction of GHG emissions
Restoration of natural ecosystem(s)
Securing continued supply of agricultural commodities

Is this project originating any carbon credits?
No

Description of project
We are participating in a collaborative project run by the Earthworm Foundation. The first is the Southern Central Forest Spine Project in Malaysia which is focused on balancing sustainable production, forest conservation, resilient livelihoods, and good labor practices.

Where is the project taking place in relation to your value chain?
Project based in sourcing area(s)

Start year

Target year
2025

Project area to date (Hectares)
1,631,842

Project area in the target year (Hectares)

Latitude

Longitude
Monitoring frequency
   Six-monthly or more frequently

Total investment over the project period (currency)

For which of your expected benefits are you monitoring progress?
   Other, please specify
   - Forest Protection
   - Farmer Resilience
   - GHG Emissions
   - Worker Well Being
   - Government Support and Capacity Building
   - Community Rights

Please explain
   To date, 98 out of 108 palm oil mills sourcing from the focal area have been engaged on NDPE [No Deforestation, No Peat and No Exploitation], of which 39 mills have submitted self assessments and are working on action plans to address NDPE issues. Preliminary spatial mapping has been completed to identify palm oil mills to engage with in order to achieve fresh fruit bunches (FFB) traceability. 42 mills have started collecting traceability data. And being a strategic bottleneck in the global supply chain, 16 out of 18 palm oil refineries operating in the landscape have adopted NDPE policies.

Project reference
   Project 2

Project type
   Other, please specify
   - Forest ecosystem restoration, peatland protection & restoration, reforestation, natural regeneration, soil carbon sequestration, agriculture

Expected benefits of project
   - More inclusive, transparent, and empowering governance processes
   - Net gain in biodiversity and ecosystem integrity
   - Protection of human rights
   - Protection of land tenure
   - Reduce/halt biodiversity loss
   - Reduction of GHG emissions
   - Restoration of natural ecosystem(s)
   - Securing continued supply of agricultural commodities

Is this project originating any carbon credits?
   No

Description of project
   The second project is the Riau project in Indonesia which is focused on presenting a compelling case for balancing commodity production with forest conservation, sustainable livelihoods and the welfare of people at scale.

Where is the project taking place in relation to your value chain?
   Project based in sourcing area(s)
Start year

For which of your expected benefits are you monitoring progress?
Other, please specify
Forest Protection Farmer Resilience GHG Emissions Worker Well Being Government Support and Capacity Building Community Rights

Please explain
To date, with companies, local government and communities, the project is working to protect 91,687 ha of forest. Through collaboration with the Riau government, we helped 603 farmers begin to replant 1,104 ha of oil palm plantations. So far, have worked with government agencies and 11 communities on land-use planning and conflict resolution.

F7. Verification

F7.1

(F7.1) Do you verify any forests information reported in your CDP disclosure?
Yes

F7.1a

(F7.1a) Which data points within your CDP disclosure have been verified, and which standards were used?
Disclosure module
F6. Implementation

Data points verified
Target verifies the RSPO membership of suppliers and volume of palm oil used in products that are in scope of policy.

Verification standard
RSPO certification status is verified by our external consultant who confirms all RSPO certification numbers our suppliers provide to us with the RSPO website.

Please explain
Target monitors supplier compliance via the RSPO website and an annual supplier survey. We also participate in an annual RSPO member audit on our processes.

Disclosure module
F6. Implementation

Data points verified
Target verifies the certification status for all products labeled with FSC/SFI/PEFC logos.

Verification standard
FSC, SFI, and PEFC certification status is verified by comparing certification documents with standards organization website. This verifies good standing as well as expiration date of the certification. Additionally, scope of certification can be verified this way as well. This verifies that the goods being sold under the certificate match what is being produced.

Our PSQA team verifies this under an audit created by the RMA (Raw Material Assurance) team. RMA team is responsible for managing claimed materials audits.

Please explain
Target monitors compliance to 3rd party certification by validating the certification status as well as performing audits on site to verify compliance with these standards.

F8. Barriers and challenges

F8.1

(F8.1) Describe the key barriers or challenges to eliminating deforestation and/or conversion of other natural ecosystems from your direct operations or from other parts of your value chain.
Target Corporation CDP Forests Questionnaire 2023 Friday, July 28, 2023

Forest risk commodity
Timber products

Coverage
Supply chain

Primary barrier/challenge type
Value chain complexity

Comment
Our primary challenge is that we rely upon the remainder of companies within our supply chain when impacting change through policies and goals. As a retailer, we rarely have visibility beyond our first tier of suppliers, let alone control over sourcing, procurement, or manufacturing processes beyond what we specify for a finished product. Additionally, since we don’t source these commodities directly, and we only use them in small amounts, we rely on others to collect accurate data and information. Due to these facts, we also have some reliance upon certification, which is often more expensive, laborious, and difficult to achieve for our suppliers. Finally, as a mass retailer active in many categories of consumer goods, our supply chain is wide and shallow, meaning we have many suppliers with small amounts of business, thus making data collection, enforcement of policies, and impact on deforestation difficult to achieve.
